SUMMARY

Software Developer specializing in frontend development with React.js and JavaScript, with hands-on experience building responsive web applications, developing reusable UI components, integrating REST APIs, working with MongoDB, and integrating AI/LLM APIs. Experienced in feature development, API integration, debugging, performance-focused improvements, troubleshooting, and Agile collaboration.

TECHNICAL SKILLS

Languages: JavaScript, Python, HTML5, CSS3
Frontend: React.js, React Hooks, Tailwind CSS, GSAP, Responsive Web Design
Backend & APIs: REST APIs, JSON, API Integration
Database: MongoDB
Tools: Git, GitHub, Postman, MS Excel
AI / GenAI: Gemini Pro API, Oracle Fusion AI Agent Studio, AWS Generative AI, Prompt-based AI Agent Integration
Professional: Agile, Debugging, Problem Solving, Team Collaboration

EXPERIENCE

Frontend Developer Intern | Apex Planet Pvt. Ltd. *Jul 2025 – Oct 2025*

- Contributed to React.js and Python web applications with a focus on frontend development, performance, scalability, and maintainable code.
- Developed and optimized application features and reusable UI components while troubleshooting frontend issues and improving user experience.
- Integrated generative AI capabilities into existing product workflows to support AI-powered user experiences.
- Collaborated with developers in an Agile environment on issue tracking, debugging, bug fixing, sprint activities, and project delivery.

PROJECTS

E-Book Store – Full-Stack MERN Application *Sep 2026*

- Built a full-stack e-book marketplace using React (Vite), Node.js, Express.js and MongoDB, with book browsing, search, category filtering, and ratings/reviews.
- Implemented JWT authentication with role-based access control, and secured REST APIs using Helmet and express-rate-limit.
- Integrated Razorpay (test mode) for payments and built a "My Library" section with protected PDF downloads accessible only to purchasers.
- Developed an admin dashboard to add, edit and delete books, with PDF and cover image uploads using Multer.

Invoice Generator – React Application *Jan 2025*

- Built a React-based invoice generator supporting itemized products, configurable quantities, pricing, tax rates, and discounts.
- Implemented invoice PDF export using jsPDF, enabling users to generate downloadable invoices from application data.
- Applied reusable UI components and form-based interactions to create a practical, user-friendly invoice workflow.

Resume ATS Tracker *Jun 2025 – Jul 2025*

- Built a Python-based ATS resume analysis tool using the Gemini Pro API to evaluate resumes against job descriptions.
- Generated resume scores and identified ATS-compliance and keyword gaps to improve resume-job alignment.

EDUCATION

B.Tech in Computer Science (AI & ML) | SRIMT, Lucknow *Aug 2022 – Jul 2026*

- CGPA: 7.5 / 10

Class XII | St. Joseph's Senior Secondary School, Kasganj *2020 – 2021*

- Percentage: 82%

Class X | St. Joseph's Senior Secondary School, Kasganj *2018 – 2019*

- Percentage: 89%

CERTIFICATIONS & AWARDS

- Foundations Associate, Oracle Fusion AI Agent Studio – Rel 1
- Infosys Data Analysis Certification
- AWS Generative AI Certificate
- Best Hackathon Organiser, College

LANGUAGES

English, Hindi
